

Standard Traffic Barrier Range

The **Paramount** Standard Barrier is the ideal solution for vehicle flow rates of up to 300 per Hour, and is designed primarily for car park control.

- A popular choice for businesses, and local Authority Premises.
- Smooth and Powerful operation via a motor, gearbox drive unit, controlled through an inverter for precise control.
- Operation of the barrier is completely non-hydraulic eliminating leaking pipes and unions and providing low service costs with higher levels of reliability.
