

# PARAMOUNT HIGH SECURITY PEDESTRIAN GATES

Data Sheet HSP

## High Security Pedestrian Gate

The Paramount **HSP** gate has been designed for areas of significant importance such as a high risk premises or areas suffering from vandalism.

As standard the gate is supplied fully galvanised and features-

- \*Bearing hinges designed for high volumes of pedestrian traffic
- \*Outer full length hinge guard to protect from sabotage
- \*Overhead Self closer.
- \*Overhead sharks teeth
- \*1.5 tonne solenoid lock
- \*Fail secure locking

Our HSP gate is not recommended for use on Emergency escape routes, due to the Fail Secure locking system.

Optional powder coating is available on our **HSP** range in any RAL colour.

The HSP gate is designed as standard to receive electric security fencing to the inside face of the gate.
