

Portcullis™ High Security Fencing & Gates

The Paramount **Portcullis™** Palisade system is designed primarily for defence against intruders. The high security design acts as a substantial deterrent against climbing from both the secure and insecure side of the fence, ramming by vehicles and forcible attack.

Portcullis™ is manufactured in standard heights of - 2.4m, 3.0m, 3,6m; custom heights are also available on request up to 5.0m

*Paramount **Portcullis™** holds a registered Trade and Design Mark 1031211*

Portcullis™ is the ideal choice where high security really counts, designed specifically to meet the requirements of military installations, bonded warehouses, refineries, communication centres, utility companies, and any application where strategic protection is essential.

Portcullis™ can be combined with security mesh, offering further increased security. Available in two types, either providing a combination which is not only *highly attack resistant*, but also prevents goods and products from being passed through the secure fence line, further enhancing security of any vulnerable boundary.

Portcullis™ has been designed to pay high regard to visual amenity which is necessary in many urban and rural high risk sites.

The leading UK Security Fence & Gate Manufacturer

Portcullis™ High Security Fencing & Gates

The design benefits from a highly appealing visual aspect, as well as providing major significant advantages:

- + Smooth external face making it difficult to climb unaided
- + Wide spacing on the horizontal rails to prevent an intruder obtaining an easy foot hold
- + Upright pale spacing is set to an optimum for increased security
- + Pale profile is resistant to bending in any direction and makes attack from hand tools difficult
- + High torque fixings offer maximum resistance to attack from poles or lever devices
- + Pales are retained by the Bressumer rail even if the fixings are overcome by an offender
- + Support feet improve resistance to ramming or attack from vehicles
- + 25yr Life expectancy without major maintenance in all environments.
- + Follows gradients and embankment slopes in a visually acceptable and secure way

The Unique Bressumer Rail makes forcible removal of Pales Extremely difficult

Paramount offer a wide range of manual and automatic high security **Portcullis** gates, to compliment and complete any high security perimeter project. Optional electronic fence/electric fence intrusion detection is also available on request.

Portcullis Manual high security Swing gates

Portcullis Automated high security swing gates

Standard Finish: Hot dip galvanised to BSEN 1461

Optional powder coating can customise the fence into your own corporate colours, or will match with an existing or new powder coated fence. Ask our sales team for a colour chart.
